CompletelyReleased Fire and Sword, a custom Multiplayer mod for Minecraft. The goal of the mod was to balance out the MP classes and make all of them viable and interesting, while staying true to the lore of each faction. However, Fire and Sword is not an RPG mod, but a balanced real time strategy game. Instead of choosing your class from pre-made groups, you choose your class at the end of the match. Depending on your faction, there are eight viable classes for you to choose from. The class choice

is a form of in-game PvP, as you can see who has the highest stats and best equipment. The in-game changes to the mod are not permanent, and cannot be reversed. The mod is only intended to be used for a single Minecraft session.
